Описание функций ClickHouse для работы с запросами:

<https://clickhouse.com/docs/ru/sql-reference/functions/>

Запрос из интерфейса пробрасывается в БД с добавлением границ временного промежутка и выбранных тенантов, пример: `... AND (Timestamp >= 1715689595208 AND Timestamp <= 1715689895208) AND (TenantID IN ('a1fbde7a-76d3-4bbc-a769-82126b41b56f')) ORDER BY ...`
